

Landlords

How can you *show* a prospective tenant that the site you're pitching may be a perfect fit for them?

Retailers

How can you quickly determine which of your existing stores is most comparable to a site under consideration?

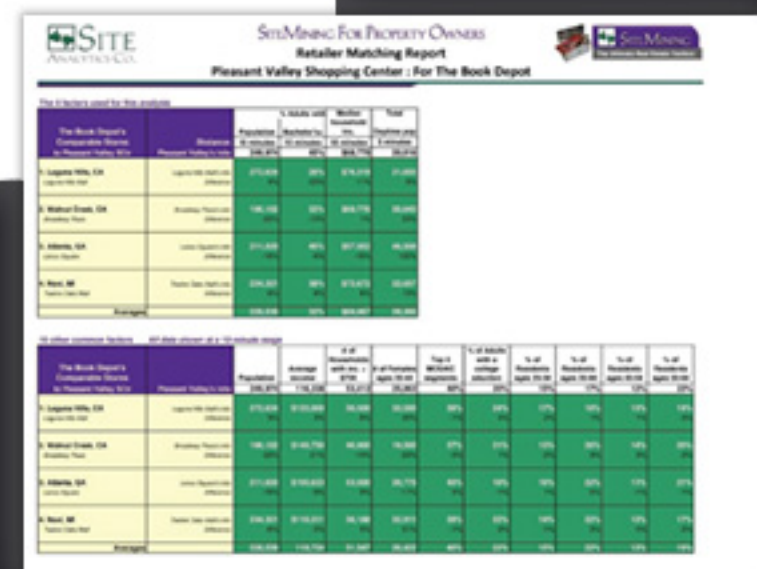

The answers are: **SiteMining for Property Owners** and **SiteMining for Retailers**

For years, tenants have been using our **SiteMining for Retailers** online tool to help them understand how a new opportunity stacks up with the site choices they've made before. Now, **SiteMining for Property Owners** puts that same power in the hands of a site's leasing, marketing, and brokerage team.

So SiteMining reports can form the basis of a truly useful discussion for both parties about the site.

This is not a GIS system. It's an online *analytic* tool. And there's nothing else quite like it.

Come by our booth at ICSC RECon to learn more. On the spot, we'll create a customized analysis for you for your specific site and for your specific retailer. Or, we can visit your booth and run a report there. Contact us today to book an appointment. Booth #237, North Hall (Marketplace Mall), Sunday through Tuesday.
